

# MEDIA WALLS

Media walls are an excellent way of displaying your graphics, providing a massive display area. Low sheen textile means that it is ideal for taking photos against without flash reflections. The frame is made from hard wearing aluminium tubing, and the display panel is effectively a sock that fits over the frame, held taught by the fabric tension.

The units are 2.2 meters high and are available at 2.4 and 3 meter widths. You have the option of both straight (flat) media walls, and curved media walls.

- Large display area
- Tension fabric zips around aluminium base
- Wrinkle-resistant polyester fabric
- Quick setup with no tools required
- A double sided option is also available
- Comes with carry case
